

COMPONENT REBUILD CENTRE

The central graphic is a collage of various industrial and manufacturing scenes. It includes a worker in a hard hat and safety glasses looking at a tablet, a large industrial component being lifted by a crane, a close-up of a worker wearing a headset, a detailed view of a mechanical part, a worker in a hard hat and safety glasses looking forward, a workbench with various tools, a worker's hands using a tool on a component, and a stack of metal components. The text "COMPONENT REBUILD CENTRE" is overlaid in large, bold, yellow letters, with the letters partially obscured by the images. The word "COMPONENT" is on the top line, "REBUILD" is on the second line, and "CENTRE" is on the third line.

**WELCOME TO THE
REBUILD UNIVERSE**

**AN INVESTMENT
FOR THE FUTURE**

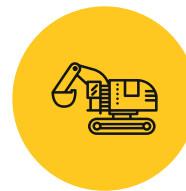

OUR CRC OFFERS SUSTAINABLE AND PROFITABLE SOLUTIONS TO BETTER MEET THE RECONDITIONING NEEDS OF THE REGION

Thanks to efficient logistical support and even more modern technical facilities, our teams are able to refurbish the major components of your Cat equipment at best cost and to manufacturer standards.

OUR MISSION

Our mission is to provide customers with reconditioned components that offer performance equivalent to that of new components at a fraction of the cost of

Thanks to our expertise and our commitment to quality, these reconditioned parts benefit from the same level of warranty as that offered by the manufacturer.

EXTENSIVE CAPACITY

- **1 000 m²** for reconstruction
- **200 m²** for metalizing and machining
- **300 m²** for performance tests
- **500 m²** for preparation and inspection of components before releasing them
- **1000 m²** for reconstruction

TECHNICAL EXCELLENCE:

Our state-of-the-art equipment enables accurate and reliable inspection of the condition of parts, quick and effective repairs, and rigorous tests to ensure the performance and durability of each reconditioned

ENVIRONMENTAL COMMITMENT:

By opting for reconditioning rather than importing new components, you can reduce your carbon footprint by up to 90%. Our CRCs recycle hundreds of metric tons of end-of-life products every year, limiting the use of new natural resources and significantly reducing the impact of freight transport to and from Africa.

COST REDUCTION:

The CRC reduces the costs of reconstruction while ensuring the durability of components. We extend the lifespan of your parts without compromising on quality thanks to our vast range of modern inspection and restoration equipment.

DIGITIZATION AND TRACEABILITY:

Our processes and operations are fully supported by a professional digital management tool.

This digitization ensures complete traceability of the work, increased transparency, and optimal responsiveness to the needs and expectations of our customers. Processing deadlines are tracked in real time, allowing teams to take proactive action to meet our commitments.

Through our online platform, our customers can also track the progress of work on their components in real time and access technical reports.

CONTINUOUS IMPROVEMENT:

With an approach that promotes the safety, efficiency, and quality of operations, each component is refurbished to the highest standards of performance and reliability, and which are constantly being improved.

YOUR CAT MACHINES ARE DESIGNED FOR SEVERAL SERVICE LIFETIMES, NOT JUST ONE. EXTEND THE SERVICE LIFE OF YOUR EQUIPMENT. YOU DON'T NEED TO GIVE UP ON THE EQUIPMENT YOU ALREADY POSSESS.

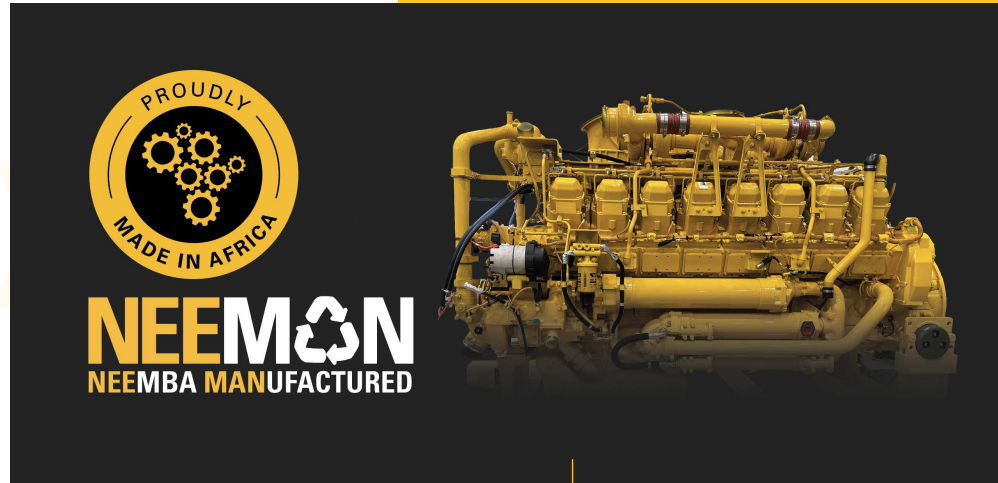

Our Standard Exchanges

«NEEMAN»

NEEMBA

MANUFACTURED

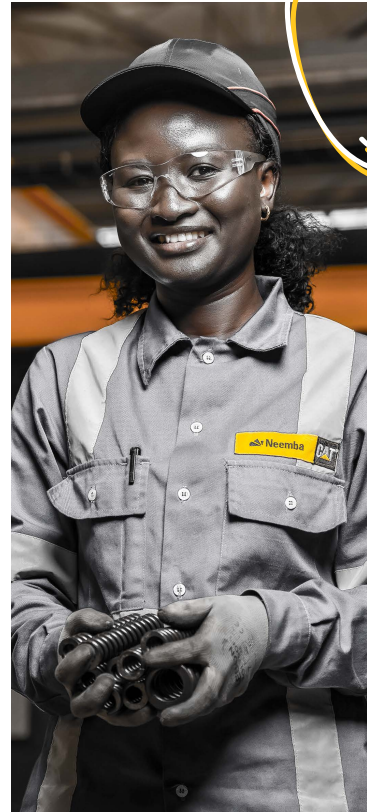

**CAT-certified
reconditioning is the best
investment you can make
after the purchase of
your equipment.**

With the «**NEEMANN**» Neemba Manufactured standard exchange program, we provide you with a uniform and constant quality of service within our network, and at **fixed cost**.

You get fully renovated components in compliance with the highest manufacturer standards, available immediately off-the-shelf. Bearing the stamp of quality and durability, these components are eligible – subject to conditions – to extended warranties of up to **10,000** hours of operation.

LOCAL IMPACT AND TRAINING FOR YOUNG PEOPLE

The **Neemba Senegal CRC** is not only a **rebuild** center, but also an **integrated training center**. We offer continuous training programs for **talented young people**, thus contributing to local employment and professional development. Our goal is to support the growth of the next generation of **qualified technicians**.

« My experience as a trainee has been incredibly enriching. I've been able to develop my skills both theoretically and in practice, developing my knowledge of the basic principles of mechanics and engineering while putting these lessons into practice by working directly on components. Mentoring has been a key element of my professional development. I am supervised by experienced technicians who share their knowledge and who are always on hand to guide me. This has helped me to develop my technical skills, but also to gain confidence and move my career forward. »

VALUING DIVERSITY

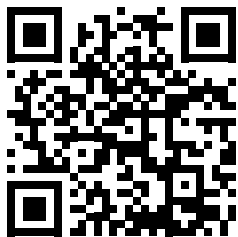

Diversity at the Neemba Component Rebuild Center

At Neemba, diversity is one of our core values. As a Cat dealer, our Component Rebuild Center (CRC) plays host to a diverse and inclusive team, reflecting our commitment to equal opportunities.

We strongly believe that different perspectives enrich our working environment and stimulate innovation. Our CRC is proud to welcome talent with a diverse array of profiles, working together to deliver high-quality reconditioning and rebuild solutions, while supporting the professional development of every employee.
